## 2. Number of visitors

### 1. Visitor number of JASIS each day

	JASIS2018	JASIS2017	JASIS2016
Day before the Day 1	149	194	498
Day 1: Sept. 5 (Wed.)	7,663	8,219	8,228
Day 2: Sept. 6 (Thu.)	8,024	8,291	7,136
Day 3: Sept. 7(Fri.)	7,861	8,152	8,519
<b>Total</b>	<b>23,697</b>	<b>24,856</b>	<b>24,381</b>

The duplication count by registration ID was completely eliminated and each ID was counted assuring “one visitor/one time count”. In addition, the exhibitor name tags were counted separately, and were not included in the visitor count.

New system for registration ID count has been applied since JASIS 2017.

The counting with and without duplication of ID was successfully completed.

The number of visitors including duplication count of registration ID for each day was:

	JASIS2018	JASIS2017	JASIS2016
Day before the Day 1	149	194	498
Day 1: Sept. 5 (Wed.)	7,770	8,347	8,560
Day 2: Sept. 6 (Thu.)	9,915	10,171	9,071
Day 3: Sept. 7(Fri.)	10,369	10,680	11,247
<b>Total</b>	<b>28,203</b>	<b>29,392</b>	<b>29,376</b>

The flows of visitors were investigated and analyzed by the new counting system.

Around 90% of visitors who attended "New technology presentations" and "JASIS conference" also visited the exhibition halls.

It shows that coming and going of almost all visitors among exhibition halls and other area had been achieved.

# 3. Visitors' Profile

The visitor profile analysis was performed based on admission registration forms filled out by the 23,697 exhibition visitors. The following four points are year-by-year visitor characteristics for this exhibition. These same trends were also exhibited in this year.

1. The category of analytical and scientific instrument users accounted for over half of attendance.
2. According to aggregation by region of employment, visitors from Tokyo and its surrounded areas reached to more than 75% of attendance.
3. Visitors were from all categories of industry, with no single industry dominating.

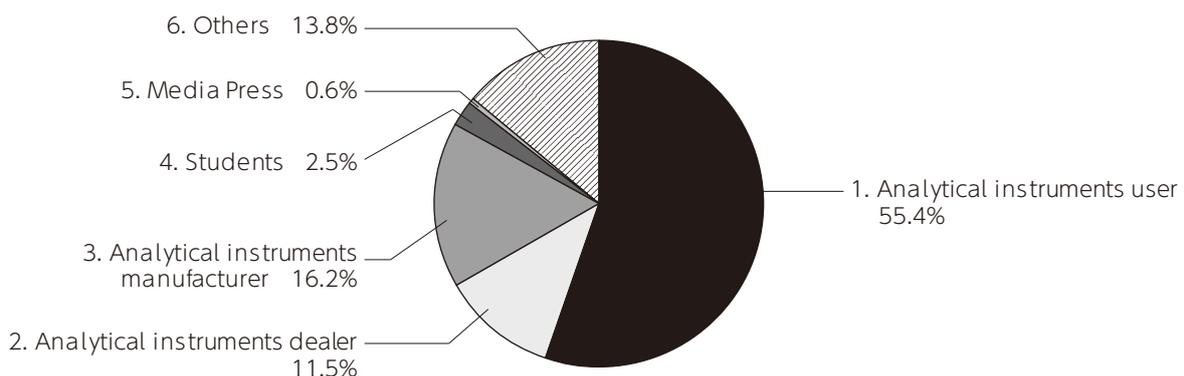

The following industries had relatively high presentation ratios at about 6 to 17%:

Electronics, Electric, Machinery / Trading companies / Technical service (analysis, testing, inspection) / Chemical products (ink, paint, pesticide, aromatics) / government offices, public institutions / Pharma chemicals, Reagents, Cosmetics / Foods.

4. Breakdown of job classifications: R&D: about 29%; sales: about 19%; Analysis / testing / inspection / measurement: about 19%; production / manufacturing / quality control: about 8%.
